

ABOUT SERVICE **CONSULTANCY**

Our consulting service is based on the analysis of policies, processes, procedures, organizational structures, technologies in general, hardware, software and risk management, with the aim of collaborating with those companies that want to know what is the cybersecurity risk they face. their critical business processes are exposed under the gaze of the preservation of confidentiality, integrity and availability of information.

ABOUT US

We are a highly specialized team in digital transformation that provides personalized solutions adapted to the needs and business objectives of our clients. Our approach is focused on increasing the profitability and competitiveness of our clients in an increasingly digitized business environment.

We know high standards and how to keep cyberspace safe and resilient as a fundamental foundation.

WE ARE

CYBER **FORTTE**

WHY CHOOSE OUR CONSULTING SERVICE

Our service is based on the international standard ISO 27001, which establishes requirements for the implementation of an information security management system (ISMS), which will make it possible to measure the gaps in the protection of sensitive or valuable information (employees, clients, suppliers, financial, legal, operational) in the corporate use of information technologies, with the aim of improving their protection, defense and resilience capacities against cyberattacks.

**Don't let cybersecurity be
a problem in your
company!**
