making your business a safer
and more efficient place!*

ABOUT CULTURAFORTE

Our Cybersecurity Culture service was developed to support and raise awareness among people and areas of companies about the risks or threats currently present and thus reinforce their first line of defense.

WHY CHOOSE OUR SIMULATION SERVICE

Our service offers a innovative methodology and algorithm that allows your company to efficiently identify and measure the most likely areas and users/collaborators to suffer Phishing attacks by cybercriminals. With this service, you can always be one step ahead in the protection of your assets and sensitive data.

The results are consolidated in a statistical report that is easy to understand for the management of your company, so that they can make informed and strategic decisions. to improve your cyber security.

Don't waste any more time and contact us to protect your business effectively!

"Don't wait to be attacked, act now"

Abraham Almarza - CTO Cyberfortte

TRUST CYBERFORTTE SIMULATION

Our team of experts in cyber security will ensure that your company is prepared to face any threat. With our application developed under the highest standards international best practices in development code, resilient and secure infrastructure, we can guarantee the confidentiality, integrity and availability of both your information and that of our service.

OUR SERVICE AWARENESS

Thanks to the data and statistics of simulations, the Cultura Fortte service is developed for companies to acquire personalized workshops designed for teach how to: identify, prepare for, and avoid future cyber threats.

To do this, we use different tools that help us classify your employees levels of how vulnerable they are to different types of phishing.

"Our commitment is to protect clients with professionalism and integrity"

Maritza Benítez - CEO Cyberfortte

ABOUT CULTURE OF SECURITY

To make a culture of cybersecurity effective, we have developed different talks, covering everything necessary so that your collaborators can keep their data and that of the company safe.

We are focused on the latest trends and most common threats today. We train your collaborators so that they learn to identify and be alert to future Phishing attacks.
